Assisant Clerk
Burnham Parish Council
Burnham Park
Windsor Lane
SL1 7HR

14TH March 2025

Dear Laiba

Please find enclosed the tree survey in relation to the trees situated within Burnham Parish.

A ground level inspection was carried out between November 2024 and March 2025 on the basis of the Visual Tree Assessment (VTA) Examination method devised by Mattheck and Breloer (The Body Language of Trees.)

This report and recommendations relate to the condition of the trees and their surroundings at the time of inspection only. Height and crown spread are given to within a 50cm range of accuracy.

The Visual Assessment was carried out in accordance with accepted Arboricultural Practice and was based on apparent vitality (leaf cover live buds, extension growth.) Presence of dead wood, die back, fractured and detached limbs, evidence of excessive basal movement and external indications of stem and basal decay likely to affect the structural condition of the tree.

No equipment either invasive or non-invasive was employed. Cavities and sites of potential hollows within the trunk buttress and scaffold limbs were assessed using a rubber mallet and wire probe. Fungal fruiting bodies have been visually identified only.

Trees are living organisms therefore their health and condition can change rapidly. This report will be invalidated if there are any unforeseen changes to this site: e.g. Extreme weather conditions, excavation of soil etc.

Should you have any queries whatsoever with regards the survey, please do not hesitate to contact us.

Yours sincerely

Rebecca Watts
R Watts & Sons Ltd

N.B. Trees are living organisms; they are subject to unpredictability as a result of disease, physical damage, weather, ageing etc. We therefore recommend that they be inspected on a regular basis.
